

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 2, line 17, with the following replacement paragraph:

In one embodiment, a method of transmitting a signal is disclosed. The method includes assigning priorities to transmitted signals. Signals that have a lower ~~prior~~ priority compared to signals with a higher priority are delayed until the higher priority signals are switched. In certain embodiments, a delay pulse is sent to by the higher priority signal or signals to the lower priority signal or signals.
